## Frontend Developer

Passionate Frontend Developer with years of experience in designing and developing user-centered web applications using HTML, CSS, JavaScript, and ReactJS. Proficient in creating responsive designs and collaborating with cross-functional teams to deliver exceptional user experiences. Seeking a Frontend Developer position to further hone my skills and contribute to a dynamic, collaborative team environment. Portfolio includes 35+ successful projects.

### Core Competencies

HTML • CSS • Sass • Javascript • React • React Native • Typescript • Unit Testing

### Language

Arabic (native) -

English (Good written and spoken)

### RECENT PROJECTS

#### E-commerce Platform Project:-

E-commerce with a dashboard Built with React for a performance and dynamic user experience

#### Technologies:-

Firebase - Tailwind CSS.

Leveraged Firebase for secure user authentication, product management, and real-time data management. Utilized Tailwind CSS for rapid and responsive UI development.

#### Key Skills Demonstrated:

- Proficiency in React development practices.
- Understanding of component-based architecture.
- Tailwind CSS for efficient and scalable styling.
- Integration with Firebase for authentication and database functionalities. E-commerce website best practices (product listings, shopping cart, checkout).

#### Note App Project:-

Built a user-friendly note-taking application using fundamental web development technologies.

**Features:** Users can create, edit, and delete notes.

Built a user-friendly note-taking application using fundamental web development technologies.

**Technologies:** Utilized JavaScript for user interaction, data manipulation, and dynamic updates. HTML structured the application's content, and CSS provided visual styling.

**Key Skills:** Understanding of DOM manipulation to manage note elements. Event listener implementation for user actions (adding, editing, deleting notes).

Local storage usage for persisting notes across page refreshes.

#### Key Skills Demonstrated:

Understanding of DOM manipulation to manage note elements.

Event listener implementation for user actions (adding, editing, deleting notes).

Local storage usage for persisting notes across

## Todo App Project:

Developed a functional to-do list application using core web development technologies

### Functionality:-

Users can add new tasks, mark them as completed, and visually distinguish completed tasks.

### Technologies-

Utilized JavaScript for user interaction and dynamic updates, HTML for structuring the application, and CSS for styling the user interface

### Key Skills:-

Understanding of DOM manipulation using Event listener implementation for user interaction (adding, marking, deleting tasks). Creation of a user-friendly interface with HTML and CSS. JavaScript.

### Portfolio:-

This project is a simple responsive web portfolio to show my experiences, projects and contact information.

Responsive design: The website adapts to different screen sizes and devices.

Animations and transitions: The website uses CSS animations and transitions to create dynamic and interactive effects.

Grid and flexbox layouts: The website uses CSS grid and flexbox to create complex and flexible layouts.

Sass and BEM: The website uses Sass, a CSS preprocessor, and BEM, a naming convention, to organize and maintain the code.

## Certifications:-

Frontend Professional Diploma: 4 Tracks | 22 Courses | Certification | Diploma

**React: Basics to Advanced Track :** 3 courses: React Basics, React deep dive, React Projects. Certification

**JavaScript: Basics to Advanced Track :** 4 courses: Javascript Fundamentals, Javascript Intermediate, Javascript Projects I, Advanced JavaScript Projects II. | Certification • Certification

## EDUCATION

Almadrasa Frontend Diploma

Nov 2023 - May 2024

I benefitted immensely from completing the Intensive School Diploma in Learning Programming from Scratch to Professional Front-End Development. This comprehensive program equipped me with essential programming skills, including mastering Python, HTML, CSS, JavaScript, and React, enabling me to proficiently develop dynamic web applications. Moreover, it provided valuable certificates, practical project experience, and networking opportunities, significantly enhancing my capabilities and readiness for the tech industry.
